### Partnerships

Partnerships working with the requirements of Workplace Health and Safety (OS&H), Workers compensation board WCB, Certificate of recognition COR, Department of transportation DOT, and other federal, provincial, municipal safety, health, and environmental regulatory agencies can be overwhelming for any company, especially small companies. Combine that with implementing the appropriate programs, administering training, and conducting audits and all of a sudden, it becomes difficult to even know where to start.

What HSE Energy Services offers is a partnership to help bridge the gaps and create a successful health, safety and environmental management solutions for small and large businesses.

We provide partnership services for both small and large businesses to take the guesswork out of creating, implementing, and continually maintaining a successful health, safety and environmental management system. These partnerships offer support with various compliance and risk related initiatives, are customized to fit each client's specific needs and are the perfect fit for human resources, facilities, and management professionals that, in addition to their normal functions, are tasked with compliance and risk management.

# TEAMWORK

HSE Energy can successfully place countless numbers of high quality candidates in health, safety & environmental positions that have worked closely with many employers over the past 20 years to fill their HS&E vacancies. #### Methods used to improve health, safety, environment in all areas where human efforts are required

## Professionals at work for your needs

Connecting your business to the health, safety, and environment needs

#### Green energy

Green energy is any energy that reduces the impact on the environment by decreasing waste or reducing the use of fossil fuels. Wind turbines, electric cars and solar energy are examples. Businesses frequently can save money by instituting green policies, and some green energy remodeling projects can make your business eligible for a tax deduction. When businesses institute green energy systems, they serve as role models to their customers and increase awareness of environmental issues.

HSE Energy has Programs and Products to help progress your staff and company
